

**St. Cecilia's Pulic School**  
**Earth Day**  
**Primary Wing**  
**April 23, 2021**

To sensitize the students about the need to take care of Mother Earth - a number of activities were held. This was one of the most keenly-participated activity emphasizing the fact that how aware children are towards challenges facing Earth and their inherent zeal for Earth's preservation.

The poster- making activity involved poster on our Mother Earth with a huge umbrella over it to suggest the depletion of ozone layer and our efforts to protect it. Some of the posters depicted the urgency to save water and trees. Some students made head gears with the message to 'Save Earth'. Students also prepared powerpoint

presentations on the same. Beautiful and meaningful poems on Mother Earth were recited by the students. Many participated in 'Express Yourself' as well.

While performing this activity students did ask many questions and also gave their valuable ideas and suggestions about how they can contribute in 'Save Earth Campaign..'

The posters prepared by students showed plethora of colours and their vivid imagination.

Such activities will groom our Cecilians into a conscientious citizens of the world.
