

**St. Cecilia's Public School**  
**Geekoz IT Club**  
**Flipbook Competition**

Geekoz IT Club of St. Cecilia's Public School organized Flipbook Making Competition for classes VI to VIII on 17.5.2024. Students made beautiful Flipbooks on the topics Cyber safety and Security (Class VI), Smart homes – future ready homes (Class VII) and Technology a boon or bane (Class VIII). Students used Canva / Powerpoint software for making flipbooks. They added relevant content, images and icons on beautiful backgrounds to their pages.

Competition was conducted to enhance creativity, digital presentation making skills and also to create awareness among the middle wing students about the latest and critical topics related to technology. Students need to be made aware about the online threats and how they can prevent themselves from these threats. Students also learnt about smart homes and how devices are controlled remotely in smart homes. Technology is a boon for a society but if it is not used wisely it can create destruction. Students learnt how to use technology wisely.

Principal Mam encouraged the students by appreciating their flipbooks. She also advised the children about the wise use of technology and how they should prevent themselves from the ill effects of excessive internet and technology use.
