Objective of the competitions

To develop their creative skills and improve eye-hand coordination. Also to promote interest and appreciation for the various IT applications.

Every year Geekoz IT Club organizes various competitions for all the classes. This year the club organized Scenery making, Story making and game making competition for primary classes.

Students showed their creativity fulfilling the task given using the various tools available in the software. Students showed a lot of enthusiasm during these competitions.

The winners were awarded with medals and certificates.
