

**St. Cecilia's Public School**  
**Maths Club**  
**Activity – Heavy and Light**  
**Class – I-ABCD**  
**Date: 26<sup>th</sup> April, 2023**

Activity based on comparison of objects/ things in terms of heavy and light was conducted by all the sections of class I by the class teachers. In order to teach this to kids, it is important to get them physically involved with the weight of different objects while teaching them the concept of heavy and light. Different objects from the surroundings were taken. Children were given many objects to hold and feel. They were very excited to categorise the objects to heavy and light. It helped them to determine what objects they can pick easily and what objects they cannot. It was a great learning experience for them to understand how to compare two or more objects. Outcome of the activity was fruitful.

**Objects:** Pen, Pencil, leaf, bag, bottle, cricket ball, basket ball, balloon, chair, table, cup, box(full), box(empty), safety pin, scissors, pencil box etc.

**Game:** Tug of war.

Two children one side and twenty on another.
