

St. Cecilia's Public School
Scientia Club
Inter Class Quiz
Class IV-V

The Scientia activity for the month of May was conducted with the students as an interclass Science Quiz on the topics of – Food & Health, space & Universe, Our Environment & Plants and animals.

First round for selection of final participants was conducted by class teachers themselves. Eight students were selected from each section of class IV & V respectively to represent their section in two separate rounds.

This instilled a sense of participation among the students. Children came prepared well for the quiz & showed great enthusiasm to participate.

During the quiz, students in the audience paid rapt attention and were following the questions easily. There were various types of questions ranging from spellathons to MCQ, terms identification etc. Such activities encourage the students to develop scientific temper & know more about ourselves & our environment.
