

**St.Cecilia's Public School**  
**Class: 2**  
**Maths activity**  
**Let's Learn Fractions**

The fractions activity with bread, biscuits and chocolate was fun filled and enjoyable for students. The use of edible items like bread, biscuits and chocolate made learning experience most relatable and engaging for students. They learned the concept of sharing a whole thing into equal parts making half, one-third and quarter. This hand on approach helped them grasp the fundamentals of fractions and made learning experience interactive. Overall it was a productive learning experience making a potentially challenging topic more relatable for the students. They learned about how the numbers less than 1 are formed and written. It laid a strong foundation for their future learning in mathematics.
