Quiz Club

Map Activity

Major Soil types of India

Class - X

As part of the Quiz club a map activity was conducted in the month of August, students of grade 10th located '**Major Soil types of India**' as a subtopic of **RESOURCES**.

Soil is one of the most important natural resources which supports the growth of plants by holding the roots firmly and supplying water and nutrients.

This map activity helped the students to identify the major soil types in India.

Six different types of soils that are found in India are Alluvial soil, Red soil, Black soil, Laterite soil, Mountain soil and Desert soil or Arid soil.

ST.CECILIA'S PUBLIC SCHOOL

The Quiz club of the school conducted a map activity in the month of September.

With this activity, the students of grade 10 explored the **Indian map** to locate all the major **Dams in India** that contribute to managing the rivers system of our country.

Dams play a vital role in a country's water management system, including irrigation, flood control, hydroelectric power generation, and water supply. This activity gave the students a clear understanding of the important dams in India, their geographical location, and associated rivers.
