Maths Quiz
Class III-V

Quizzes help to assess mathematical skills, proficiency and aptitude of students. Quiz was conducted for class III on 18th July and for Classes IVth and Vth on 16th July.

The objective of the quiz was to encourage the students to look beyond their textual knowledge and learn to apply the concepts learnt. The questions in the quiz were logical and practical, to test their mental ability, critical and application skills.

The best part of the quiz was the enthusiastic response of the children.

The event helped the students in identifying their capabilities and motivated them to learn and expand their knowledge.

Solving questions help students to boost their self-confidence and learning at the same time.
