

St. Cecilia's Public School
Maths Club Activity
Class VIII
18th Novemebr to 20th Novemebr 2022

The Maths Club of Middle wing organized an activity based on their understanding of the topic-**Quadrilaterals** for the students of class VIII. The students eagerly performed an activity on the types of Quadrilaterals and depicted it through project method to ensure a hands-on-learning experience.

The various sub heading covered by the students were:-

Properties of different types of Quadrilaterals on the basis of side, angles and diagonals.

Types of Quadrilaterals covered were:

Rectangle

Square

Parallelogram

Rhombus

Trapezium

They comfortably performed the activity under the able-guidance of their teachers. It turned out to be a grand success with active and enthusiastic involvement of our students. Students gained a lot of knowledge through this activity.
