Role Play of a Scientist

SCIENTIA CLUB

Under the able guidance of Madam Principal, the Scientia Club successfully organized a “Role Play of a Scientist” activity for students of Classes IX to XII on 21 April 2026 and 5 May 2026 in two rounds. Around 20 enthusiastic participants took part in the activity. The event was judged by Ms Shashi Kalra.

The main aim of the activity was to develop scientific temperament, creativity, communication skills, and confidence among students by helping them learn about the lives and discoveries of famous scientists in an interactive manner.

Students dressed up as renowned scientists and presented their achievements, inventions, and contributions to society through role plays and speeches. Various props such as lab coats, charts, models, wigs, spectacles, placards, and scientific equipment were used to make the presentations realistic and engaging.

The activity proved to be informative and enjoyable. It enhanced students' public speaking skills, research abilities, teamwork, and understanding of scientific concepts while making learning more interesting and practical. The event was appreciated by teachers and students alike and inspired students to develop curiosity towards science and innovation.
