

St. Cecilians Public School Annual Science Exhibition (2019 -20)

Science is inextricably linked with our lives and helps us to understand the world around us better. Scientific and technological developments contribute to progress and help improve our standards of living. It thus becomes imperative to encourage our students to think, learn, solve problems and make informed decisions.

To generate curiosity and develop scientific attitude amongst learners, the Scientia Club of St. Cecilia's Public School, Vikaspuri, New Delhi organized the Annual Science Exhibition on 18 Nov 2019.

The exhibition witnessed great enthusiasm and blooming participation from students. The students explored and expressed their unique ideas in the form of activities and models. They displayed their creative ideas in an organized, neat, simple yet attractive manner. The event gave them a platform to give dimensions to their ideas revolving around the themes like Agriculture, Sources of energy and their conservation, Transport and Communication, Health and emergency services. They designed their own motor boat, automatic soap dispenser, hydraulic jacks, simple cooling devices, smoke collector, energy saving bus etc. The students also got unique experience of demonstrating and explaining their ideas to respected Manager madam, Principal madam, Academic Advisor sir, Co-ordinators, judges and to all students who further enhanced their confidence.

This event was a great learning experience for both students and teachers alike wherein it seemed that the world of science practically came alive through our young innovators.
