

St Cecilia's Public School
Session 2023-24
State Level Third Position
In Science and Mathematics Exhibition

“A winner never stops trying. If one has to be a winner in life,
one has to aspire and constantly go beyond best.”

Scientific temperament and Mathematical aptitude are skills that are consistently nurtured in Cecilian students along with academic learning. The students are well trained to believe that the important thing in Science is not so much to obtain new facts as to discover new ways of thinking about them. This training and guidance reaped fruits as Bineet Kaur and Shrishti Tyagi of Class X won the THIRD POSITION at STATE LEVEL in the event ‘Science and Mathematics Exhibition’ on 4th December 2023. The students presented their project on the topic – Millets: Forgotten Grains or Smart Crops.

Madam Principal accolade the students as well as the teachers for their dedicated efforts to make their mark at the State Level and encouraged them to continue their tread on the path to excellence.
