

St. Cecilia's Public School

Various Map activities

Class IX

As part of the Quiz club, various map activities were organised in TERM 2 for students of grade 9th which included activities to know more about the country INDIA.

Activity 4: On a river map of India students located Major rivers of India showing the drainage pattern, understanding the course of major Himalayan River System and the Peninsular Rivers and their tributaries

In the month of November, Activity 5: On a political map of India students marked the places receiving the highest and lowest rainfall. Students learned about the uneven distribution of rainfall in India and the influence of relief and monsoon winds.

Later in the month of December, Activity 6: Locating and labelling the state having highest and lowest density of population was conducted where students understood how population distribution varies across India due to physical, economic, and social factors.

These map activities enhanced students' understanding of India's physical features, climate variation, and population distribution. The activities improved map-reading skills and helped relate geographical concepts with real locations.
